

Creating users and roles in Talend Cloud

Overview

This module taught you how to access Talend Management Console, create a Talend Cloud role, user and user group.

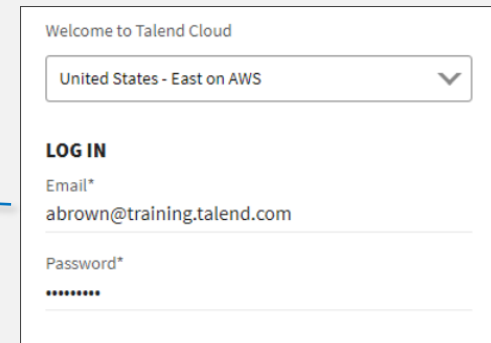

Key steps

1 Access Talend Management Console

To access to the Talend Management Console, you need to connect to Talend Cloud Portal using a Web browser.

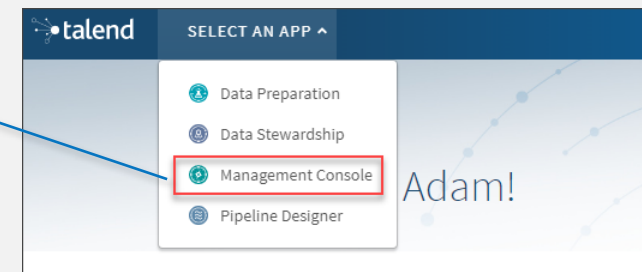

To log in Talend Cloud Portal, you can use your user name, email defined as follows :

- <login name>@<domain name> .

Then, once logged in Talend Cloud Portal, there are several applications that are available .

You can launch the Talend Management Console application as shown on this screenshot.

The Talend Management Console application will allow you to :

- Create roles, users/user groups
- Create projects
- Check available licenses
- Govern, manage tasks
- Monitor task execution

2

Create a Talend Cloud role

Roles consist of Permissions.
Several predefined roles are already available in TMC.

Here is a sample of predefined roles in TMC.

You add a new a Talend Cloud role by :

- providing a role name
- selecting permissions

This is an example of a new role and selected roles.

	OPERATIONS
	MANAGEMENT
	PROJECTS
	ENGINES
	ENVIRONMENTS
	PROMOTIONS
	CONFIGURATIONS
	USERS
	GROUPS
	ROLES
Name ▲	
	Campaign Owner
	Cloud Project Administrator
	Data Preparation Administrator
	Data Preparation Manager
	Data Preparator
	Data Steward
	Dataset Administrator
	Dataset Manager
	Dataset Viewer
	Environment Administrator

Add role

Create new role to adjust role permissions

Role name*

Custom_Talend_Cloud_Role

Permissions

☐ Management Console

☒ Management Console

☐ Artifact repository - Configuration

☒ Engines - Manage

☒ Environments - Manage

☐ Export Logs - Manage

☒ Groups - Manage

☐ Operations - Manage

☐ Password policy - Manage

☒ Projects - Manage

☐ Promotion - Manage

☒ Promotion - Start

☒ Roles - Manage

☐ SSO - Manage

☐ Static IP - Manage

☐ Subscription - Manage

3

Create a user and user group

Using TMC application, you can create a user and assign roles.

When creating a user, you need to provide :

- Email
- Login name
- First Name
- Last Name

And, you can select roles for this user.

Email*
testus@gmail.com

Login name*
testus @trial14120.eu.talend.com

First name*
adam

Last name*
brown

Phone

Job title

Roles
Cloud Project Administrator x

When creating a user, you can send an email to activate the user and create a password.

You can also create a user group and assign users.

In this example, two users are assigned to the user group.
