

# Cloud Quickstart

## Objective

The Talend Cloud Quickstart program helps you to get up to speed on your data management use cases in the cloud following a 5-day time-boxed approach and focusing on helping you to accomplish the following objectives:

- Installation and configuration
- Apply best practices from our Talend Reference Architecture to your particular environment
- Enablement and knowledge transfer on the core capabilities working with your data

## How it Works

### Hands-on enablement with a Talend Consultant

A Talend consultant will guide you step by step through the features and capabilities of the Talend Cloud Data Integration platform, showing you how to use the various features, including: remote execution, the operational framework, administration functions, job design best practices, working with template jobs, tuning and more.

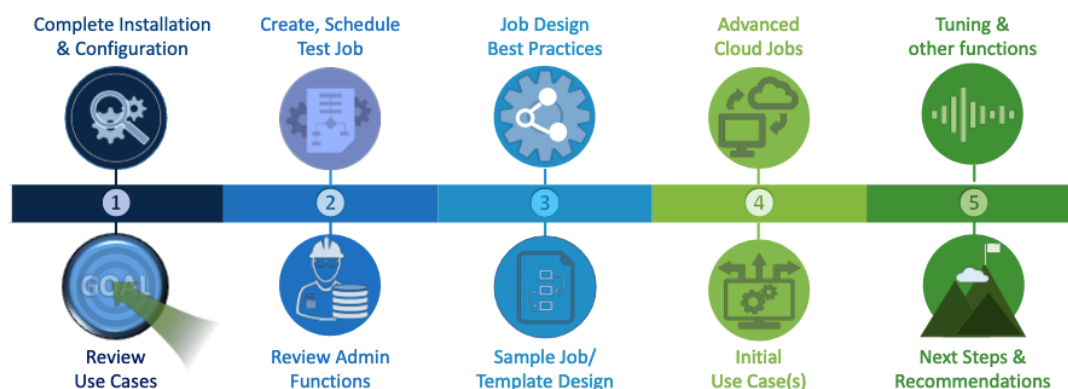

### Develop integration components for your own initial use cases

Your consultant will work with you at the outset to identify appropriate data sets and use cases from your environment so at the end of the program you'll have live Cloud Data Integration solutions in place and running to meet current challenges –more than training, we'll help you get started implementing live solutions.

You'll work with the consultant on a full range of Cloud integration tools and techniques, including:

- Creating a test job and promoting it to the preferred execution engine
- Administrative functions of Talend's Cloud Data Integration
- Review of optimal job design and other best practices
- Tuning your jobs and configuration for optimal performance
- Introduction to advanced cloud jobs
- Building elements and sample job designs and patterns related to selected use cases

The continuous, 1-week program covers the following agenda:

# Outcomes

The value from the Quickstart program comes from your speed in getting started with Cloud Data Integration, getting your developers up and running as quickly as possible, moving up the learning curve rapidly and with ease, to start enjoying the benefits of operating in the cloud. Cloud benefits typically include the following:

- Lower infrastructure costs
- Outsourcing a range of concerns like server administration, backup, and security so you can focus more on your use cases and business objectives
- Avoiding the costs associated with upgrades, like testing and re-testing

The QuickStart provides three main outcomes of value:

- Installation, configuration and testing – your environment is ready to start working on your use cases
- Enablement on Talend Cloud features – familiarity with all the main features of the product and how to use them
- Enablement on specific needs – introductory work on your specific needs and objectives to work with your data

## Training Prerequisite

Talend Academy Courses: Introduction to Talend Studio, Talend Cloud Data Integration Tutorials, and, if relevant, Talend Cloud Data Preparation and/or Talend Cloud Data Stewardship.

## Prerequisites

Technical staff familiar with the ETL process must be available to work with the Professional Services consultant during this engagement.

## Terms of Use:

The following terms and conditions shall apply to a customer's purchase of the Talend Cloud Quickstart services (hereinafter a "Pre-packed Service"). "You" or "Your" or "Customer" shall refer to the purchaser of such Pre-packaged Service. This engagement may be done onsite or remotely provided that the Talend consultant shall be given full access to all necessary customer resources as reasonably practicable to allow such Talend consultant to perform or complete the services described herein. All fees are quoted exclusive of local taxes and Expenses. You must use the total (days and/or hours) purchased for the applicable Pre-Packed Services within 12 months from the date of purchase or they will be forfeited. Customers shall be responsible for all reasonable actual travel and out-of-pocket expenses ("Expenses") incurred in connection with any onsite services rendered, provided that Talend agrees that any reimbursement of such Expenses may be limited by Customer's standard travel reimbursement policies. Talend reserves the right to assign or re-assign any Talend consultant performing the Pre-packaged Services, upon written notice to Customer. Customer understands and agrees that the Talend consultant will be performing only the Pre-packaged Services purchased by Customer and such services do not include any custom deliverables or other activities other than those described herein. Talend reserve the right, in its sole discretion and upon notice, to modify or discontinue any aspect of the Pre-packed Service, provided however, that no such modification shall materially degrade or diminish the Pre-packed Service for which a customer has already purchased prior to such notice.
