ARTHA SOLUTIONS

Think Data Think Artha

Talend Cloud Rapid Implementation

Objective

Artha's Talend Cloud Rapid implementation program eases the way into your data management use cases with a 2-week time-boxed project implementation plan to assist you in accomplishing the following objectives:

➔ Installation and configuration

➔ Apply best practices from our Talend Reference Architecture to your environment

➔ Enablement and knowledge transfer on core capabilities

How it works

Get trained with the guidance of an Artha Consultant

An Artha consultant will guide you step by step through the features and capabilities of the **Talend Cloud Data Integration** tool, showing you how to use various features including:

| Administration functions	Best practices for job designing	Working with template jobs	Performance tuning

Develop integration components for your own initial use cases

Artha consultant will work with you at the outset on the project to identify appropriate data sets and use cases from your environment, so at the end of the program, you'll have live Cloud Data Integration solutions in place, up and running to meet current challenges. You will work with Artha consultant on a full range of Cloud integration tools and techniques, including:

✓ Creating a test job and deploying it on a preferred execution server.

✓ Administrative functions of Talend Cloud Data Integration.

✓ Review of optimal job design and other best practices.

✓ Building elements and sample job designs and patterns related to selected use cases.

✓ Discuss the outcome of the Rapid Implementation on how to utilize the learnings from this project

Low cost & High Reward **Talend Rapid Cloud Migration Implementation** in **2 Weeks**

Approach

Complete Configuration & Installation	Create, Schedule, Test Job	Job Design Best Practices	Advanced Cloud Jobs	Tuning and Other Functions

| Review the Usecases | Review the Admin | SampleJob/ Templates Design | Initial Set of Usecase(s) | Discuss Next Steps and Recommendations |

Outcomes

The value from the Rapid Implementation program comes from getting you up to speed on Cloud Data Integration, getting your developers up and running as quickly as possible, moving up the learning curve rapidly and with ease, and to start enjoying the benefits of operating in the cloud environment.

Cloud environment benefits typically include the following:

Cost
Low Infrastructure costs

Upgrade
Avoiding the costs associated with upgrades, like testing and re-testing

Administratin & Security
Outsourcing of a range of essential services like server administration, backup, and security, so you can focus more on your use cases and business objectives

Add-Ons: Talend Cloud Rapid Implementation Add-ons may be purchased in one (1) Day increments under an Order Form for the following services:

Installation
Your environment is ready to start working on your use cases

Talend Cloud
Familiarity with all main features of the product and how to use them

Enablement
Introductory work on your specific needs and objectives to work with your data.

Training Prerequisite

Talend Academy Courses: Introduction to Talend Studio, Talend Cloud Data Integration Tutorials, and, if relevant, Talend Cloud Data Preparation and/or Talend Cloud Data Stewardship.

Prerequisites

Technical staff familiar with the ETL process must be available to work with the Professional Services consultant during this engagement.
